How Do I Access the Main Campus When I Park Far Away?

Employees who park in lots G, H and I are encouraged to utilize the steps leading up to the Pavilion. This route is maintained by Bill Sitterly and the hospital and has better lighting than the sidewalk. It also is a closer walk for most employees. The sidewalk on the east side of Kroger that runs along Goslin is not maintained by the hospital and is not the best route due to the delivery trucks coming in and out on a daily basis. Please see the map to the right if you are uncertain where the steps are located. Remember that during winter weather, the FMC crew will be out addressing the patient visitor areas first, then the staff areas. During periods of inclement weather, FMC will work as hard as they can to keep up; however, everyone needs to take precautions and wear proper footwear.

For those that park far away, please walk across the Kroger parking lot to this staircase located by the Pavilion to access the main campus.

A special publication for the FMC facility expansion project.

Vol. 1, No. 24

Project BRIGHT is a $37.8 million facility expansion underway on FMC’s main campus. The FMC Marketing Department publishes this newsletter on a regular basis to help keep FMC team members and the community well informed. To be added to our electronic distribution list, or to submit a question about Project BRIGHT, email us at marketing@fmchealth.org.
